KenCloud™ Asset Management System

Swash Convergence Technologies Limited

KenCloud™ AMS (Asset Management System)

Access Info. Anytime Anywhere

Overview

When it comes to managing overall assets of the organization, almost every asset intensive industry is facing difficulty in effective management.

Basic Challenges they face

- Deciding the time to repair/replace the aging asset.
- Lower life time value of the asset than expected.
- Low productivity and dependability on asset.
- Inefficient supply chain.
- High maintenance cost and slow realization of ROI.
- Wide disbursement and lack of asset visibility.

A structured asset management solution can deliver enormous advantage in terms of long term availability of assets with low maintenance, certainly results to efficiency, reliability and improved life cycle performance.

In order to maximize Life time value (LTV) of the assets, the organization needs to track the activities related to the assets, acquire detailed and updated information, and ensure that they align with the organization's strategic and operational objectives.

Overcome challenges and Give your Business a boost with KenCloud™ AMS

Asset tracking and management has never been easier as **KenCloud™ AMS** brings you calculation of assets appreciation and depreciation as a piece of cake. It provides an insight of all your enterprise assets, their conditions and work processes for effective planning and control. Why Swash's KenCloud™ AMS

Primary reasons setting it apart

- Promoter is an IT Architect – understands the products in the industry & have made KenCloud™ AMS one notch better through their in-depth domain expertise.

- KenCloud's IT architecture and nuances which is exhaustive at the back-end & user friendly & secure in the front-end, is a key USP.
- Not too complicated for deployment as well as use
- Simple console and report availability in only "3 clicks" make the software very easy to use
- Extremely cost competitive in the industry, 'pay per user' models. Zero cost of acquisition for the buyer
- Mobile integration - SMS and Conference Gateway Embedded
- 100% mobility solution for tracking and managing through all versions of Android, iOS, Windows, tablets and express pads

Insights: Modules

Turn-Key Cloud Based Solution

- Being an easy to use, cloud based asset management solution greatly reduces or eliminates the need for IT staff to be involved in the rollout and use of the system. This allows IT staff to focus on providing other value added services.
- Easy to Use Designers & Wizards make it easy to tailor the system to your needs.
- "Know How" Videos are available to guide you if you get stuck.
- Friendly and knowledgeable support is just a phone call away.

Data Import

Easily import a spreadsheet of Assets using the built in Data Import Wizard .

Bar Code Scanning

Quickly lookup assets by scanning a Bar Code on your Smart Phone or Tablet (requires iPhone 4 and above, iPad Mini, iPad with Retina Display or Android based Smart Phone or Device with an Auto Focus camera)

Mobile device Accessibility

- Quick and easy access to information through PC/Tablet/Smart Phone.
- Ease in looking up asset records by typing search words or scanning Bar Codes.
- Maintain the accuracy of your Asset Inventory by easily updating the asset records from anywhere.

Information Security

- Multiple layers of security are built into the Cloud Hosting environment.
- SSL Encryption protects your data as it transfers from your computer, tablet/ Smartphone to our servers.
- Layers of Intrusion Detection prevent unwanted access to your data.
- Password Strength features enforces strong passwords so they are not easily guessable by password cracking tools.

Scalability

- Whether you have a few hundred assets or a million, the system will grow with you.
- The asset management software was designed to handle growth.
- The Cloud Hosting environment can dynamically increase server capacity as it is needed.

Flexibility

Our Asset Management Software was designed from the ground up to be highly flexible and easy to use. Data Fields, Data Entry Forms, Record Lists, Work Flows/Business Rules, Reports, Dashboards and more can easily be changed as your business needs change

Business Rules & Work Flows

- Work Flows and Business Rules can easily be defined in the Work Flow Designer to automate many manual processes.
- Trigger email notifications based on a set of conditions to keep team members or managers informed.
- Automatically create and assign maintenance requests based on certain criteria

API Data Integration

- Eliminates the need for managing data in two places by automatically synchronizing the asset record changes.
- Add KenCloud AMS Asset records from another system.
- Search or get a list of KenCloud AMS Assets from another system.
- Automatically add a Maintenance Request in another system when the asset is flagged as Broken or a Next Maintenance Date occurs.

Reporting & Dashboards

- Single click Access to summarized information on Dashboard Charts with full Asset details.
- A Basic Report Builder allows you to step through a Wizard to select the data fields you want to report on and define how you want the report data grouped, sorted and filtered. It also allows you to create click through charts that can be place on a Dashboard.
- An Advanced Report Designer can be used to take basic reports to the next level. The designer gives you complete control on how you want the report to look.
- The Dashboard System allows you to define multiple Dashboards for different purposes (i.e. Operations, Manufacturing, Marketing, etc.)

Innovation at Swash:

Our Developers are innovators, rather than being followers. Since inception, Swash has continuously working on its technical platforms to map itself with the current IT trend. It enables Swash to use latest platforms to differentiate itself from others. Our aim behind using all the latest technical platforms is to give our clients a scalable solution. Business in current market is no longer limited with traditional boundaries. With rapid change in technology, we ensure that we can deliver best possible technical services to our valuable clients.

Technology Stack:

We are recognized by Microsoft as Windows Azure Featured Partner world-wide, Microsoft Cloud Accelerated Partner & Microsoft Small Business Specialist. We specialize in developing strategies and software solutions, which are built around latest Microsoft technologies, to enable IT cost savings and increased profits for our clients. Our KenCloud AMS is built on Windows Azure platform, the most advanced and revolutionary Internet-scale computing and services platform hosted in data centers managed or supported by Microsoft.

Deployment

KenCloud ERP Suite is available both as on premise as well Software-as-a-Service (SaaS) models. It is the most preferred choice for businesses across the globe as it encompasses in-built intelligence and business acumen for your industry.

Multi Device Accessibility

The entire suite of products is accessible over the Internet, which gives you the freedom to access information from any part of the globe at the click of a browser button, whether from a laptop, a PDA, mobile phone or a tablet PC. So, you and your colleagues can monitor, manage and execute tasks even when you are on the move.

Swash Advantage

- Large and complex project engineering and handling capabilities
- End-to-end solutions for global clientele
- Extensive domain expertise
- Sizable resource pool with diverse skill sets
- Strong customer and vendor relationships
- Strong service delivery chain
